Fyi – Jennifer Wendel and I will provide tag team support from SARDB on the mining sites issue.

Jen is out the rest of this week and I'm out all of next week.

I participated in meetings w/Dana, Shahid and Lois yesterday where Jim provided direction. We discussed an OSRTI memo on a stand down of field investigations and generating a list of sites subject to the stand down.

Shahid has the lead.

FYI since you are acting for Doug.

Randy – FYI – since you are involved in the PASI stuff.

Beth, thanks for the heads up. I knew that he was involved in the training that Cindy and Lynne are doing on Monday but had not seen the slides. And yes, this certainly is a sensitive matter. Jim, Dana and Doug are all attending the Tribal Lands and Env Forum next week (late Tu – Th).

## Deliberative Process/Ex. 5

Given the sensitivity and timing, I've copied several people.

Thanks again for the heads up!

Hi, Anne. I presume you are aware of the presentation Dave Tomten is giving next week at the Tribal Lands Forum on:

**Deliberative Process/Ex. 5**

draft presentation.

Attached is his

**Deliberative Process/Ex. 5**

**Deliberative Process/Ex. 5**

Let me know if you all have concerns.

Beth

**Importance:** High

Hey guys – I'm going to sit in on the DD call this afternoon. In the meantime, can you let me know if there are any sites you are aware of where EPA is actively involved in assessment or cleanup – or planned assessment/cleanup, where Gold King, tailings dam breach, etc. potential may be an issue? I'm checking with RPMs, SAMs and OSCs, but would love your input. Thanks for being on the call today!

**Importance:** High

Folks,

I am working at the Emergency Operations Center related to the Gold King Mine spill. As you know, Gina McCarthy is in Colorado and meeting with three attorney generals. Jim Woolford is going to have a call with the Division Directors and will be sending out an email stating the following:

## Deliberative Process/Ex. 5

In the meantime the NMT has been tasked to come up with an inventory of sites that have ongoing or future assessments with features containing fluids (mine workings, tailings dams, open pits, heap leaches). So we need to develop a matrix of sites with the following fields:

# **Deliberative Process/Ex. 5**

There may be more information but I need to jump on to another call. Thanks!
